**01** Overview of the components.

**02** Remove the dust cover of the suction cup and check the bottom of the suction cup before use, ensuring it is clean, intact, and undamaged.

**03** Identify suitable surfaces that are dry, level, smooth, and sturdy. Wipe the suction surface clean before use to ensure dryness and smoothness. Press the suction cup with one hand and push the air pump inward with the other hand.

**04** Identify surfaces such as natural marble surfaces, old tile surfaces, breathable wallpaper surfaces, diatomaceous earth wall surfaces, unpainted wooden surfaces, frosted glass surfaces, and other rough or breathable material surfaces that cannot be used.

**05** When the white marking line on the air pump is only partially retracted, it indicates that the suction is incomplete. Please continue pressing the air pump until it is tightly locked in place.

**06** Keep pushing the air pump inward until it can no longer be pushed in.

**07** The white marking line becomes invisible, indicating that the air pump has reached the shortest length (compared to Figure. 5) and is ready for use.

**08** When disassembling, simultaneously pull up on the handle until the suction cup unlocks.

**09** Mount the dust cover and store the suction cup for future use.
