## L-Shape Mount Plate with Silicone Handle for Nikon Z fc

Operating Instruction

SmallRig L-Shape Grip for Nikon Z fc Camera is designed to provide a comfortable grip. The retro-style grip shares a similar texture and color with the camera; the baseplate shares the same color surface treatment with the camera and fits perfectly. The L grip secures to the camera via a 1/4"-20 D-ring screw on the bottom and comes with a built-in 1/4"-20 threaded hole on the grip that enables vertical shooting on a tripod. The baseplate features a built-in Arca Swiss plate to quickly switch to tripod shooting, and a 1/4"-20 threaded hole at the center that supports a tripod or Manfrotto quick release plate. In addition, the baseplate features a built-in cold shoe that allows attaching microphone, light, and other accessories; the plate also comes with a slot for the wrist strap. The grip adopts a compact and lightweight design, which is easy to carry around.

## **Safety Guidelines**

### **1. Environment**

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

### **2. Load Capacity**

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

### **3. Cleaning & Maintenance**

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

### **4. Structural Integrity**

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

### **5. Malfunctions**

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.
