

SmallRig

USB-C Data Cable (Male to Female)

Operating Instruction

SmallRig USB-C Data Cable (Male to Female) 5595 delivers fast data transfer speeds up to 20Gbps and supports 240W power delivery. The female connector can be fastened using two screws to cages or L-shaped mount plates with standard 1/4"-20 threaded holes. When paired with a cage or L-shaped mount plate, it allows flexible repositioning of the USB-C port to prevent accidental disconnections.

Safety Guidelines

1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.
