

SmallRig

HawkLock H21 Quick Release Rotating Side Handle Kit

Operating Instruction

SmallRig HawkLock H21 Quick Release Rotating Side Handle Kit 4485 is designed to enhance stability for handheld dynamic filming. Its universal design seamlessly integrates with standard NATO rails. The handle features an exclusive quick release slider with a patented self-locking system, facilitating the process of handle mounting. Bi-directional sliding offers freedom in installation orientation. A single press enables the handle to smoothly rotate 360° in both directions, facilitating comfortable camera maneuvering at any angle. The ergonomic design of the handle grip incorporates eco-friendly silicone with a textured surface for enhanced grip and comfort. Crafted from aerospace-grade aluminum alloy, the handle supports up to 15kg (33.1lbs), ensuring durability and sturdiness. The handle features built-in 1/4"-20 threaded holes, an H18 quick release cold shoe mount, and an H21 quick release slider, allowing for expansion with accessories such as monitor mounts (ID 4487), magic arms (ID 4488), microphones (ID 3487), LED video light, and more to cater to various shooting scenarios. The kit also features a universal H21 quick release slider with 1/4"-20 screws, compatible with the new and old cages. The slider is equipped with an anti-slip magnetic locking pin to prevent accidental slipp.

Safety Guidelines

1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural

ntegrity and increases drop risks.

5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.

Product Details

Product selling point

1. Exclusive patented quick release slider design with the self-locking system ensures fast and secure installation;

2. Bi-directional mounting enables flexible installation in any direction;

3. Effortless 360° dual-direction rotation for versatile camera maneuvering at any angle;

4. Textured eco-friendly silicone coating ensures a non-slip, anti-freezing grip, offering comfort and effortless handling;
5. Versatile built-in interfaces including 1/4"-20 threaded holes, H18 quick release cold shoe mounts, H21 quick release sliders, and strap holes for diverse shooting scenarios;

6. Constructed from aerospace-grade aluminum alloy, offering a sturdy and durable build with a 15kg (33.1lbs) load-bearing capacity;
7. Features a universal H21 quick release slider with 1/4"-20 screw, compatible with the new and old cages.

Instant Slide-in

**360° Dual Stepless
Rotation Safely supports
up to 15kg/33.1lbs**

**Standard H21 Slider for
Universal Use with Both
New and Old Cages**

Compatibility

Cages without built-in H21 NATO Rail

Cages with built-in H21 NATO Rail
