

SmallRig

Cage for Panasonic S9

Operating Instruction

SmallRig Cage for Panasonic LUMIX S9 4515 is designed to protect the camera and provide multiple expansion interfaces to facilitate content creation. The cage features a minimalist design, complemented by a silver and black color scheme that fits perfectly with the camera. The cage is secured by a 1/4"-20 screw at the bottom and a side lock on the right side, and has built-in silicone gaskets in several places to prevent scratches on the body. The built-in ergonomic handle improves grip and finger fullness. The cage does not interfere with the normal use of buttons, card slots, screen, battery compartment and other interfaces. The cage has built-in 1/4"-20 threaded holes, ARRI 3/8-16" locating hole, cold shoe, strap slot, etc. It can be mounted with accessories such as handle 2756B, microphone 3487, LED light, strap 3848, etc. for content video creation. Built-in Arca quick release plate on the bottom for direct mounting to an Arca tripod. Built-in Dual-Head Wrench on the bottom of the cage for easy disassembly and assembly.

Safety Guidelines

1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

5. Malfunctions

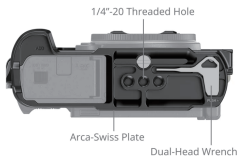

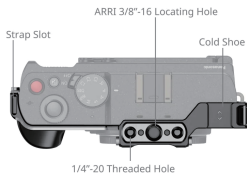

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.
