

SmallRig

Cage for Blackmagic Pocket Cinema Camera 4K / 6K

Operating Instruction

SmallRig Cage for Blackmagic Design Pocket Cinema Camera 4K 2203 is a dedicated and formfitting cage. It is securely locked by 1/4"-20 screws on the top and bottom, with additional locating pins and rubber pads on the base plate to prevent twisting and scratches. On the top and left side are built-in NATO rails, where you can attach SmallRig NATO Top Handle 1955 and SmallRig Wooden NATO Side Handle 2187 to conduct hand-held shooting. Multiple 1/4"-20 & 3/8"16 threaded holes and Arri locating holes are perfect for attaching accessories. For users who shoot with Samsung T5 SSD, SmallRig Mount 2245 is a good choice. The cage is compatible with SmallRig HDMI & USB-C Cable Clamp 2246 to fix the cables. It works with SmallRig Metabones Adapter Support 2247 to keep your lens stable. Besides, a built-in hex spanner is provided on the bottom plate.

Safety Guidelines

1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.
