

SmallRig

Magic Arm with Dual Ball Heads (14"-20 Screws)

Operating Instruction

SmallRig Magic Arm with Dual Ball Heads (1/4"-20 Screws) 3873 is compact and lightweight. Each ball head, 20mm in diameter, features one 1/4 "-20 screw and stretchable pins that prevent twisting. The adjustable thumb lever helps secure ball head at an appropriate angle and comes with a small magnetic wrench at the bottom to tighten the thumbwheels. At both ends of the ball head clamp there are notches which leave more space for flexible adjustment of ball heads as well as accessories mounted thereon. This item weighs only 88g, making it easy to carry around and store.

Safety Guidelines

1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

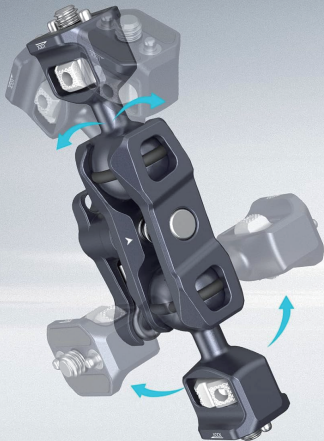

5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.

In the Box

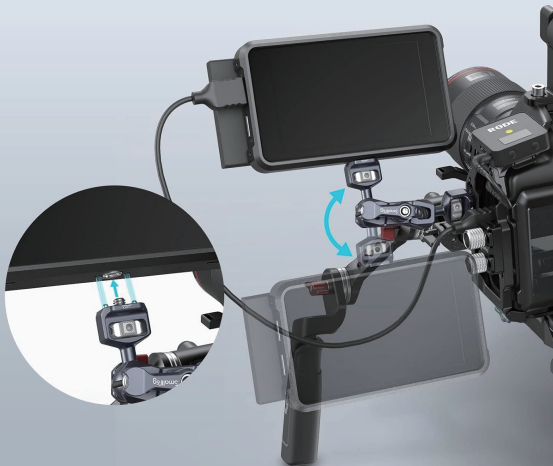

Magic Arm with Dual Ball Heads	× 1	Guarantee Card	× 1
Silicone Ring	× 2		

Multi-Angle Rotatable Ball Heads

Anti-Twist Design

Stretchable pins on both accessory mounts prevent twisting and ensure safety
