

SmallRig

Leather Camera Shoulder Strap

Operating Instruction

SmallRig Leather Camera Strap 3485 is designed to help carry your camera over your shoulder or around your neck while relieving the stress on your shoulder. You can either place it over one shoulder, cross-body, or around your neck. The strap is constructed from genuine leather and the reverse side is a soft suede-like fabric to prevent sweat from staining the clothes after a long time carrying. The neck strap has a fixed length of 43" with a built-in ring-type attachment system complete with protection flaps to prevent the rings from scratching your camera body. The strap is the classic brown design which makes your camera looks a bit more retro.

Safety Guidelines

1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.
