Dual Handgrip

for DJI RS 2 / RSC 2 / RS 3 / RS 3 Pro / RS 4 / RS 4 Pro

(BumbleBee Edition)

Operating Instruction

SmallRig Dual Handgrip for DJI RS 2 / RSC 2 / RS 3 / RS 3 Pro / RS 4 / RS 4 Pro (ID 5526) is designed to reduce arm fatigue during shooting and provide rich accessories mounts. It secures to the NATO rail on each side of the gimbal, easy for detachment and time-saving. The handgrip is designed with two-side NATO rails, which is not only horizontal adjustable, but also easy for detachment and supports shooting in inverted mode. Built-in multiple 1/4"-20 and ARRI 3/8"-16 threaded holes can attach magic arm (ID 2115) for monitor. Cold shoe ports can be used for monitor mount (ID 2905), wireless microphone, sound receiver, etc. It disassembles into four parts for easy storage and transport.

Safety Guidelines

1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.
