## Portable Carbon Fiber Travel Tripod Kit

Operating Instruction

SmallRig Portable Carbon Fibre Travel Tripod Kit (AP265C1-CH3) 5028 is a lightweight video tripod designed for travel photography users, with a maximum tube diameter of 26.5mm, 5-section tube design, compact and lightweight storage volume. Ideal for outdoor landscape shooting, urban architecture shooting and so on. Short centre column can be switched, more convenient for low camera shooting. The tripod uses high-strength carbon fibre material, which still maintains excellent stability under the compact size. The legs are lockable with a spanner, allowing for quick deployment.

## Safety Guidelines

### 1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

### 2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

### 3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

### 4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

### 5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.

## In the Box

Guarantee Card	× 1	Tripod	× 1	Tripod Head	× 1
Short Center Column	× 1	Storage Bag	× 1
