

SmallRig

Sun Hood (for Sony Mirrorless Cameras)

Operating Instruction

SmallRig Shading Hood for Sony Specific Cameras 3206 is designed to avoid reflection under strong outdoor light. Featuring a four-sided hood design, it assures you of a clearly visible screen in multi-angle shooting. Its outer layer is made from durable, scratch-resistant and sun-proof leather, while its inner layer is made of microfiber cloth which reduces light reflection and provides better shading. It is fastened by a hook & loop and fits directly onto the camera screen and can be folded flat for easy transport and storage.

Safety Guidelines

1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.
