## Universal Magic Arm with Small Ball Head (2pcs)

Operating Instruction

SmallRig Universal Magic Arm with Small Ball Head 2158 is made of two ball-head magic arms with a ball head diameter of 9mm. Each magic arm is equipped with 1/4"-20 screws at both ends. It could attach camera cage, top plate and Top Handle 1955/1984 on the one end, while attach monitor or video light on the other end. It features a wingnut in the middle to adjust the angles and positions of monitor or video light or other accessories.

## Safety Guidelines

### 1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

### 2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

### 3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

### 4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

### 5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.
