

# SmallRig

## **Cable Clamp** (for Canon EOS R5 R6 R5 C)

Operating Instruction

SmallRig HDMI and USB-C Cable Clamp for Canon EOS R5 / R6 / R5 C 2981B is designed to prevent cables from loosening and ensure stable signal transmission. With two M3 screws, the cable clamp is fixed onto the left side of camera Cage 2982, 3464, 4159, 3233. It can clamp HDMI and USB-C cables simultaneously or separately so as to prevent accidental disconnection, hence stable signal transmission.

## Safety Guidelines

### 1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

### 2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

### 3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

### 4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

### 5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.

## In the Box

Cable Clamp	× 1	Allen Wrench	× 1
M3 Screw	× 1	Guarantee Card	× 1
