

# SmallRig

## **Memory Card Case** (for Sony CFexpress Type-A)

Operating Instruction

SmallRig Memory Card Case for Sony CFexpress Type-A 4107 is an auxiliary product for photography enthusiasts. It can store two CFexpress Type-A Cards, two SD Cards, and four Micro SD Cards, which is convenient for keeping the memory cards of cameras, action cameras, and drones. Each memory card has an independent safe space, which can quickly and safely slide into the card slot for storage. Card slots with printed names of compatible cards are for quick identification. It's compact and easy to store. The outer shell is made of rugged aluminum alloy, and the inner case is made of ABS+PC material. It uses a pull-out structure to facilitate quick access to internal items.

## Safety Guidelines

### 1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

### 2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

### 3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

### 4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

### 5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.
