## V-Mount Battery Mount Plate Kit (Advanced)

Operating Instruction

SmallRig V-Mount Battery Mount Plate Kit (Advanced) 4063B is a compact, lightweight, convenient, all-in-one mounting solution for V-Mount batteries. The System includes a V-Mount battery plate, an Arca-Swiss quick-release plate, a V-Mount plate, 15mm / 0.6in rods, and a chest pad. The baseplate can be stretched to fit mirrorless / DSLR cameras of various sizes. Tool-free installation and adjustment make the process quick and time-saving. Beyond any cage with a built-in Arca-type mount, it can directly support cameras and DJI RS series gimbals via the Arca-Swiss quick release plate. The built-in 1/4"-20 threaded holes and a V-Mount plate provide more power supply solutions by attaching a Battery Adapter Plate Professional Edition (3168), Mounting Clamp for Portable Power Banks BUB2336, etc. A detachable Arca-type plate at the bottom allows quick switching between handheld and tripod shooting. The rotatable structure of the V-Mount battery plate allows 90° backward rotation facilitating screen usage and adopts damping to prevent your device from falling. There is a chest pad at the end of the 15mm / 0.6in rods ensuring more stable handheld shooting. Besides, the folding design of the V-Mount plate increases compactness and portability. The included aluminum alloy V-Mount Backplate can replace the plastic V-Mount Plate on the back of other V-mount batteries.

## **Safety Guidelines**

### **1. Environment**

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

### **2. Load Capacity**

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

### **3. Cleaning & Maintenance**

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

### **4. Structural Integrity**

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

### **5. Malfunctions**

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.
