

# SmallRig

## **Quick Release Mount Plate Compatible** (with Sony VCT-14 Specifications)

Operating Instruction

Smallrig VCT-14 Quick Release Tripod Plate 2169 is Sony VCT-14 standard which enables you to quick attach and remove your camcorder from a tripod adapter by using the lever release. The all metal construction plate offers a v-wedge adapter which is coincidence with the Standard VCT-14 Shoulder Plate. Additionally, the VCT tripod plate features multiple 1/4"-20 & 3/8"-16 threads on the bottom for attaching any QR plate to a tripod. It works perfectly with Smallrig Sony VCT-14 Shoulder Plate 1954.

## Safety Guidelines

### 1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

### 2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

### 3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

### 4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

### 5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.
