

SmallRig

Counterweight Kit

(for DJI RS 2 RSC 2 and Selected
Zhiyun Stabilizers)

Operating Instruction

SmallRig Counterweight Kit for DJI RS 2/RSC 2 & Selected ZHIYUN Gimbals 3125 is designed to balance cameras with long-lens setups on gimbals by mounting counterweights behind your camera. It clamps onto camera plate via thumbscrew, and is compatible with popular stabilizers on the market such as DJI Ronin S、RS 2/RSC 2、Zhiyun Crane 2S / 3S / Weebill-S、Moza Air2 / AirCross、RS 3 / RS 3 Pro, etc. There are multiple 1/4"-20 threaded holes at the bottom, and counterweights can be stacked to meet the balance request in different scenarios. Small shape is convenient for storage, and with strong versatility.

Safety Guidelines

1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.
