

SmallRig

Carrying Bag

Operating Instruction

SmallRig Storage Bag 3704 is designed for quick and easy storage of camera accessories, providing a solution to the problem of small accessories being easily lost and inconvenient to carry. The bag allows storing follow focus 3010, action cameras, compact cameras such as DJI Insta360 GoPro, as well as microphones, LED lights and small V-port batteries. It features inner compartments for power and communication cables and memory cards, and a carry handle on the top and side slots for quick and easy storage and a neat and tidy experience.

Safety Guidelines

1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.
