

SmallRig

Magic Arm with Rosette Gear (7)

Operating Instruction

SmallRig Magic Arm with Rosette Gear (7") 4194, made of aircraft-grade aluminum and stainless steel, features 1/4"-20 screws and stretchable pins at both ends for securely attaching such accessories, particularly with anti-twist holes, as monitors, LED video lights, microphones, mobile phones, iPads, action cameras. The thumbscrew helps lock accessories and has holes for hex spanner for further tightening; and the ball heads, which are 360-degree adjustable, come with a spiral pattern to increase friction and bear up to 3kg of load. At the stainless steel rosette joint, there is a spring for easier angle adjustment. An ergonomically designed anti-off thumb lever, with a built-in thrust ball bearing, feels smooth and comfortable and quickly locks arm and ball heads in a second. This rosette arm is CNC machined for more robustness and durability and also equipped with pads on both accessory mounts to prevent scratches.

Safety Guidelines

1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.

Product Details

Stainless steel rosette joint with hinge design and spring for easy angle adjustment

Thumbscrews with holes can be secured with hex spanner for enhanced tightening

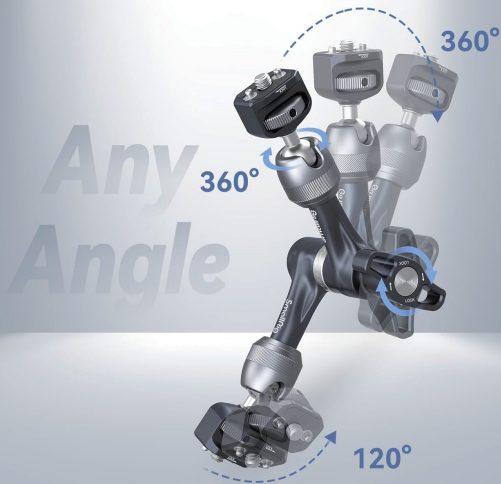

Large locking thumb lever

1/4"-20 Screw with stretchable pins for enhanced anti-twist and secure

Smooth Adjustment to Any Angle

Upgraded Anti-Twist Design

With anti-twist pins and silicone pads enhance device safety

Made of aircraft-grade aluminium alloy and stainless steel, cushions equipped on the ball heads for anti-scratch

7" Lever Arm with 3.5kg Loading

Product Compatibility

Used with Crab Clamp 3755B for camera field monitor, portable light, etc.

Monitors

LED Lights

Product Size

25.4mm / 1in

69.4mm / 2.7in

177.8mm / 7in
