

Extended Arca-Type Quick Release Plate

for DJI RS 2 RSC 2 RS 3 RS 3 Pro RS 4 RS 4 Pro

Operating Instruction

SmallRig Extended Arca-Type Quick Release Plate for DJI RS 2 / RSC 2 / RS 3 / RS 3 Pro / RS 4 / RS 4 Pro 3162B is designed to attach to camcorders or camera cages with 1/4"-20 screw and 3/8"-16 screw to prevent twists and fit in the RS 2 and RSC 2 gimbals. Compared with the original Arca plate, the plate is extended 25mm longer and increases the range for left and right adjustments to mount cameras in special shapes, such as BMPCC 4K camera equipped with a cage. A built-in magnetic flat head screwdriver is placed on the bottom for easy assembly and disassembly. Rubber pads are featured on the top to protect the camera and cage from scratching and increase the friction to secure the connection.

Safety Guidelines

1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.

In the Box

Extended Arca Plate × 1

Lock Camcorder or Camera Cage via Two Screws

For Camera Cage

For Camcorder

Product Details

Rubber Pad
