

# SmallRig

**Cage** (for GoPro HERO 13 / 12 / 11 / 10 / 9 Black)

Operating Instruction

SmallRig Power Supply Mount Plate for DJI RS Stabilizers 4189 is specially designed for DJI gimbal users to power the camera, image transmitter, and wireless receiver motor with an extended power source. It can mount onto the bottom of the gimbal before connecting V-mount batteries such as VB50 3579 and VB99 3850. It also supports SmallRig NP-F Battery Adapter Plate Lite 3018 to power such cameras as Sony FX3 or Canon R5 C. Compatible with DJI RS 3 / RS 3 Pro / RS 2 / RSC 2 gimbals, the Mount Plate features an anti-off design to keep your rig safe and stable.

## **Safety Guidelines**

### **1. Environment**

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

### **2. Load Capacity**

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

### **3. Cleaning & Maintenance**

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

### **4. Structural Integrity**

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

### **5. Malfunctions**

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.

## **In the Box**

Guarantee Card × 1

Power Supply Mount Plate × 1

# Product Details

## How to use

1. Slide the cold shoe into the gimbal's bottom

2. Toggle the buckle to the locking position

# Specifications

## Specifications

Product Dimensions: 55.0 × 55.5 × 20.6mm

Package Dimensions: 97.0 × 68.5 × 30.0mm

Product Weight: 53.0 ± 5.0g

Package Weight: 72.0 ± 5.0g

Material(s): Aluminum Alloy, Stainless Steel
