

SmallRig

Universal Tripod Dolly

Operating Instruction

SmallRig Universal Tripod Dolly 3986 is an universal accessory specially designed to move tripod and facilitate action photography. Its large and highly adaptive wheels can deal with complex terrains and have locking parts to avoid displacement due to uneven ground or collision; its extendable legs, which extend from 298mm to 435mm, make it compatible with different tripods in any opening and closing angles. This foldable and easy-to-store tripod dolly also comes with a handle and a carrying bag for easy transfer.

Safety Guidelines

1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.
