

SmallRig

L-Shape Mount PLate with Handle for Nikon Z f

Operating Instruction

SmallRig Dedicated Handle for Nikon Z f 4262 is designed to improve grip. It matches perfectly with Nikon Z f, given the same texture and color with the camera. The handle is locked by a 1/4"-20 thumbscrew with D-ring on the bottom. Its built-in Arca Swiss quick release plate supports Arca-type tripods; three 1/4"-20 threaded holes in the bottom also support tripods and Manfrotto quick release plates; and wrist holes can work with Wrist Strap 3848 / 3926. Besides, the bottom plate features an ultra-thin design to realize a net weight of only 102g, making this item more compact and lightweight.

Safety Guidelines

1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.
