

Mount Plate for AirTag for Sony

Operating Instruction

SmallRig Arca-Swiss Mount Plate for AirTag for Sony MD5423 is specifically designed for Sony Alpha and FX series cameras, ensuring a perfect fit on the camera's base. Its multi-point locking system and anti-twist tabs effectively prevent deflection or shifting, even under external forces. For added security, tamper-proof screws deter unauthorized removal while ensuring a firm attachment. The integrated hidden AirTag compartment accommodates Apple AirTag for real-time camera tracking. Inside, EVA foam padding absorbs vibrations, minimizing noise during movement. The built-in quick release plate allows for quick transitions between handheld, tripod, and gimbal setups. Additionally, multiple 1/4"-20 threaded holes provide versatile expansion options to meet various shooting needs.

Safety Guidelines

1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.
