

SmallRig

"Hunter" Foldable Multi-Tool Kit

Operating Instruction

SmallRig Folding Screwdriver Kit Hunter AAK2373 is a pocket-sized multitool designed for video photographers. It is compact and easy to be carried around, preventing loss of tiny wrenches and screw drivers. The tools are made of solid stainless steel, and the side plates are made of robust aluminum alloy. It comes with 4 Allen Wrenches 2.5, 3, 4, 3/16, 1 flat screwdriver, 1 Phillips screwdriver and 1 Torx T25 driver, covering the needs of most shooting scenarios. Screwdrivers are taken out by pulling the triggers in the side plate. The frequently used flat screwdriver is embedded in the side plate, simply push it out to use, and press the release button to draw it back. It features anti-twist design to ensure that the screwdrivers stay in the middle, more comfortable to hold and easier to use. In addition, there are threaded holes M2.5, M3, M4, M5, 1/4 on the side for storing spare screws.

Safety Guidelines

1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.
