**11 Magic Arm Support Compatible  
with 38-16 ARRI Threaded Holes**

Operating Instruction

SmallRig Rosette Magic Arm (11") with 3/8"-16 ARRI Locating Screw 4900, made of aircraft-grade aluminum and stainless steel, features 1/4"-20 screws and stretchable pins at one end, 3/8"-16 ARRI Locating screw at another end for securely attaching such accessories, particularly with anti-twist holes, as monitors, LED lights, microphones, mobile phones, iPads, action cameras, etc. The thumbscrew helps lock accessories and has holes for hex spanner for further tightening; and the ball heads, which are 360-degree adjustable, come with a spiral pattern to increase friction and bear up to 3kg / 6.6lbs of load. At the stainless steel rosette joint, there is a spring for easier angle adjustment. An ergonomically designed anti-off thumb lever, with a built-in thrust ball bearing, feels smooth and comfortable and quickly locks arm and ball heads in a second. This rosette arm is CNC machined for more robustness and durability and is also equipped with pads on both accessory mounts to prevent scratches.

## Safety Guidelines

### 1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

### 2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

### 3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

### 4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

### 5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.
