## Memory Card Case

Operating Instruction

SmallRig Memory Card Case 3192 is designed for storage and protection of memory cards. It looks pretty and feels comfortable with uneven, anti-slip texture and can accommodate 6 SD cards, 6 Micro SD cards, 2 CFexpress Type A cards, 1 CFexpress Type B card (or XQD card) at the same time. The case comes with an easy-to-operate on/off fastener, sealable silicone linings that prevent splashing and dust, card holders with printed name of compatible cards for identification, and anti-shock card trays wrapping and fixing cards. Having passed a 2m drop test, this item can effectively protect your memory cards from accidental falls.

## Safety Guidelines

### 1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

### 2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

### 3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

### 4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

### 5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.
