

SmallRig

Universal Mount Plate for AirTag / SmartTag2

Operating Instruction

SmallRig Universal Mount Plate for AirTag / SmartTag2 MD5422 is designed to help photographers efficiently track their camera's location across various shooting scenarios. It features a hidden compartment that securely holds Apple AirTag or Samsung SmartTag2, catering to different user preferences. Inside, an EVA foam pad dampens vibrations, minimizing noise during movement. The low-profile plate remain inconspicuous without interfering with the access to camera's battery compartment.

Integrated with an Arca-Swiss quick release plate, this mount plate allows direct attachment to compatible tripods and gimbals without additional adapters—streamlining your setup. The base is equipped with enlarged non-slip rubber pads to prevent twisting or shifting, enhancing equipment stability. Irregular fixing screws ensure a secure attachment for effective tracking.

For enhanced versatility, this plate features two 1/4"-20 threaded holes for attaching magic arms, mini tripods, or other accessories. Additionally, it incorporates a DJI gimbal safety pin hole, expanding compatibility with more devices.

Safety Guidelines

1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.
