

SmallRig

**7 Magic Arm Support Compatible
with 38-16 ARRI Threaded Holes**

Operating Instruction

SmallRig Rosette Magic Arm (7") with 3/8"-16 ARRI Locating Screw 4899, made of aircraft-grade aluminum and stainless steel, features 1/4"-20 screws and stretchable pins at one end, 3/8"-16 ARRI Locating screw at another end for securely attaching such accessories, particularly with anti-twist holes, as monitors, LED video lights, microphones, mobile phones, iPads, action cameras. The thumbscrew helps lock accessories and has holes for hex spanner for further tightening; and the ball heads, which are 360-degree adjustable, come with a spiral pattern to increase friction and bear up to 3.5kg / 7.7lbs of load. At the stainless steel rosette joint, there is a spring for easier angle adjustment. An ergonomically designed anti-off thumb lever, with a built-in thrust ball bearing, feels smooth and comfortable and quickly locks arm and ball heads in a second. This rosette arm is CNC machined for more robustness and durability and also equipped with pads on both accessory mounts to prevent scratches.

Safety Guidelines

1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.
