

SmallRig

Cage for PaCage for Canon EOS M50 / M50 II / M5nasonic S9

Operating Instruction

SmallRig Camera Cage for Canon EOS M50/M50 II/M5 2168 provides formfitting protection and accessory mounts for your camera. It mounts to the camera using a 1/4"-20 screw, with anti-twist design and rubber cushion on the base plate preventing wiggles or scratches. It comes with multiple 1/4"-20 and 3/8"-16 threaded holes allowing mount of accessories. For example, you can attach SmallRig Lightweight Top Handle 2949 or 2821 for hand-held shooting, and use SmallRig Cable Clamp 1822 to protect the HDMI cable. ARRI locating holes on the side are designed to work with SmallRig Aluminum Arri Locating Side Handle HSS2426 or SmallRig Ball Head Magic Arm 2115. The cage features a built-in Arca plate on the bottom which makes it convenient to directly mount on Arca clamps. The cage maintains full access to the camera's buttons, ports, and battery. It comes with attachment points for hand straps and neck-straps. A flat screwdriver is included on the bottom of the cage.

Safety Guidelines

1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.
