

SmallRig

Screen Protector for (Sony Alpha 7C II / Alpha 7CR / Alpha 7 IV / Alpha 6700 / ZV-E1)

Operating Instruction

SmallRig Screen Protector for Sony Alpha 6700 / ZV-E1 / Alpha 7 IV 3750B is designed to protect the screen from fingerprints, water spray, dust, and scratches. You can easily paste the protector on the screen via electrostatic adsorption once you align it to the edges of the screen without leaving bubbles. With a 0.4 mm ultra-thin design, which allows for natural, touch-accurate control. The screen protector has 2.5D arc-rounded edges that blend in well with the screen and allow for a more native look and feel. Besides, the package includes glass films, microfiber cloth, alcohol wipes as well as dust absorber. This screen protector offers the best protection with its IK03 shockproof standard.

Safety Guidelines

1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.

In the Box

Screen Protector × 4

Fiber Cloth × 4

Alcohol Wipe (Wet & Dry) × 4

Dust Absorber × 4

Product Details

Installation

1

Clean screen with wet wipe.

2

Clean screen with dry wipe.

3

Clean screen with cleaning cloth.

4

Finish cleaning with dust-absorber.

5

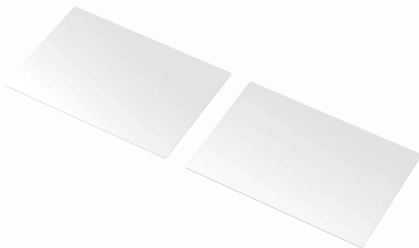

Peel off the plastic layer.

6

Match the edges and press the screen to remove bubbles.
