

SmallRig

Multi-Adjustable Chest Pad Mount Plate with Rod Clamp

Operating Instruction

SmallRig Multi-Adjustable Chest Pad Mount Plate with Rod Clamp MD3183B is designed to reduce the load while long-term handheld shooting, hence making the shooting process more comfortable and stable. Attach the camera via SmallRig 15mm Carbon Fiber Rods and Bottom Mount Plate with Dual 15mm Rod Clamp (e.g., 851 and 1674) for load-reducing shooting. The chest pad can be quickly switched between horizontal and vertical modes with one click, providing more comfortable support. The rotation can be adjusted by 115°. The damping can be adjusted with the provided allen wrench, making it suitable for multi-angle shooting. The soft cushion with removable velcro for easy replacement provides a more comfortable long-shooting experience.

Safety Guidelines

1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.
