

SmallRig

Thumb Grip for FUJIFILM X100VI / X100V (Sliver)

Operating Instruction

SmallRig Thumb Grip for FUJIFILM X100VI / X100V (Sliver) 4566 is designed to enhance the grip and improve safety when holding the camera with one hand. The thumb grip is easily installed by sliding into the camera hot shoe. The concave design of the grip improves safety and enhances convenience while one-handed shooting, facilitating content creation. The thumb grip is engraved with the "FUJIFILM" sound wave and the foundation year as our tribute to FUJIFILM. Built-in silicone pads protect the camera body and hot shoe electronic components from dust, rust, and electronic shorts. It also comes with a shutter release button to ensure a soft and comfortable finger touch.

Safety Guidelines

1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

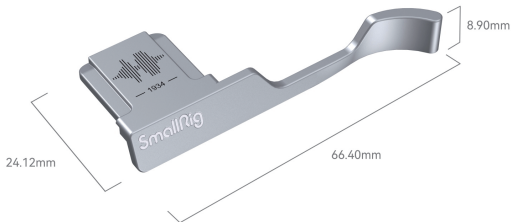

5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.

In the Box

Thumb Grip	× 1	Shutter Release Button	× 1
Guarantee Card	× 1		

Product Details

Easy to Use

Compatible with X100V / X100VI.

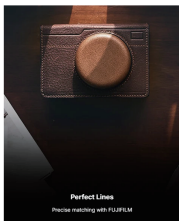

Interpretation of Classics

Silver and black colors

Imprinted Tribute

The "FUJIFILM" sound wave

Perfect Lines

Precise matching with FUJIFILM

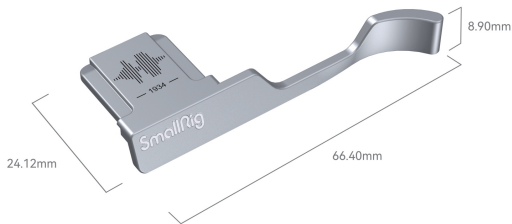

Aluminum Alloy Shutter Release Button

The concave design ensures a soft and comfortable finger touch, while the color adds style and elegance.
